

Communication site energy cabinet management system

HJ-CS-ECMS V2.0

Product Introduction

The Energy Cabinet Management System for Communication Sites is an important application of the Huijue EMS Energy Management System in the field of communication sites, specializing in the management of energy cabinets in communication sites. Through the integration of power equipment, energy sources, security equipment, environmental equipment and other types of resources, it realizes centralized monitoring, intelligent scheduling, and effective management of energy sources in communication sites to ensure stable power supply and normal operation of equipment in communication sites and improve the service reliability of the communication network. Improve the service quality and reliability of the communication network.

Resource Integration

Intelligent Monitoring

Intelligent scheduling

High reliability

Parameter

Communication site energy cabinet management system

HJ-CS-ECMS V2.0

Centralized management of integrated power supply cabinets in communication sites, and display of geographic data.

Monitoring screen: global situation at a glance

Equipment monitoring: real-time visibility of integrated power cabinet indicators

Fault alarms: timely response to equipment abnormalities

Operation and maintenance can check the equipment's running status

Application Scenarios

Mainly used in various communication sites, including base stations, data centers, communication hubs, etc.
